Don't be Stampeded

By the "lowest prices on earth," "world-beating bargains," "unheard-of offers," "marvelous triumphs in buying," etc. All is not gold that glitters. Price and quality go hand in hand. Twenty-five cent carpet is only worth twenty-five cents and is only half as good as the fifty cent grade. Barn paint at forty-five cents a gallon is adulterated until it is only worth forty-five cents per gallon, and should not be compared with a purer grade at sixty-five cents per gallon. We know all the tricks of the trade, but we have no desire to be tricky. If we can't sell you a good article at a low and reasonable price, we don't want your business—worthless goods we are determined to avoid. Our buyers are tempted almost daily to buy cheap goods, but our standing order says, "Get quality first—the price is secondary."

Our prices are low only when the quality is considered—then they are lower than those of any other firm in America.

Confidence—We Want Your

We have been in business 30 years—upright, honest business, treating our customers as we ourselves would like to be treated, and in all that period we have never to our knowledge given a customer the "worst end" of a bargain. The following letter is genuine testimonial, illustrating the confidence of old customers have in us. They know us and know that we want the trade of their children when our children are in command of this business.

Our Word is Sufficient

An indorsement of our methods by a gentleman who has tried them for 21 years:

FERRON, UTAH, Dec. 3, 1900

GENTLEMEN: I take pleasure in advising you that the goods purchased from your firm over a year ago is entirely satisfactory and you can have your guarantee back if you want it. Your word is plenty good enough for me on anything. It was my first purchase from Montgomery Ward & Co. twenty years ago and have found out that I am perfectly safe, whether you guarantee a thing or not. I have found out by experience that your word is good. Yours respectfully,

The Man from Glengarry.

Order by No. MO 73 By Ralph O'Connor. Illustrated. 12mo, cloth. "The Man from Glengarry" is a story of the East and the Great Northwest. The opening scenes are laid in that intensely interesting district lying between the Ottawa River and the St. Lawrence, known as "The Indian Lands," where types of Old Scottish Highlanders, French Canadian and American character meet in pioneer settlement life. The life of the district is full of broadly human interest and the strong tendencies of the differing civilizations are

The Crisis.

M O 45 By Mr. Winston Churchill. Mr. Hamilton W. Mabie, in the "Outlook," says of it: "Mr. Winston Churchill's 'The Crisis' must rank among the foremost books of the year. No more realistic and sympathetic study of Mr. Lincoln has been made than that which is presented in this book, and the figure grows upon the reader as he passes from chapter to chapter. It has the elements of originality and power, and above all profoundly interesting. It possesses the great quality of interpreting American life

from an intelligent American point of view. A process very much more than most people think." The book has eight charming illustrations by Howard Chandler Christy. In size and style it is unique with "Richard Carvel," being a 12mo, cloth, gilt (Postage, 13c). Price per vol. **98c**

A New Top for the Old Buggy Our \$8.35 Buggy Top Offer

Give us the distance from one side of the buggy seat to the other, outside measure, and we will send a top that will fit exactly.

Why not fix up the old rig and make it serviceable for another season. We would rather sell you a new buggy entire but if we can't do that we at least would appreciate your order for a new top. The making of buggy tops is new to us. For years we have been shipping them by the thousand—many an old rig now carries one of our adjustable tops. Have the old rig painted, invest in a new top and your buggy will look like new. We can furnish either three or four bow tops at same price, but we always send a three bow top, unless it is distinctly stated on order that a four bow top is wanted. Our tops are made in the trimming room of our own factory at Chicago Heights, Ill., under the supervision of our superintendent. They have the same distinctive style and finish that have made our buggies famous.

A 600-pound Platform Scale \$6.55

Standard Size Accurate and Substantial

A First-Class 600-lb. Platform Scale, well built and nicely finished, at a price that places us beyond competition.

Nine years ago we sold this same scale for \$11.50. We then bought it from a local jobbing house. A year later we got it direct from the factory and were able to reduce the price to \$9.00 and shortly afterward to \$8.50.

We now have them built to our order in 1000 lots—we own the patterns and control the output so that we are in a position to sell at almost the factory cost of production.

We positively guarantee the corners of the platform to agree absolutely with the center of the platform. Every scale tested with U. S. sealed weights before leaving factory. We make them in 600-lb. capacity only. By making only one size, all alike, and selling in immense quantities, we are able to make the low price.

Our Ball Bearing Drop Head Sewing Machine

Description of our M. W. & Co. Improved Ball Bearing Sewing Machine

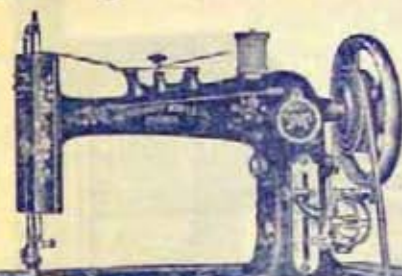

construction it is almost an exact copy of the Domestic, with a double eccentric for operating shuttle and feed lever, and is perfect in adjustment. The head is large, highly symmetrical in appearance, and is of the following dimensions: bed plate, $14\frac{1}{2} \times 6\frac{3}{4}$ inches; length of arm, $11\frac{1}{4}$ inches; distance from bed plate to under side of arm, $5\frac{1}{2}$ inches. It is double japanned and handsomely ornamented in colors. The bearings, or parts subject to wear, are made of the finest steel, case-hardened, adjustable, accurately fitted, and can be run at a high rate of speed without injury. The face of fly wheel, bobbin winder and all the under works are polished and nickel plated. The feed is the best used on sewing machines, as it is a double-four motion, drop-feed, positive in action. Has no

slugs, thus insuring uniform stitch. The cabinet is made of polished steel, cylindrical in form, self-threading and perfectly balanced. The shuttle spring is adjustable, so that lower tension is under perfect control. The shuttle carrier is lined with steel to prevent unnecessary noise in running. The tension regulating device is on top of arm, and is easily adjusted by means of a thumb screw. The needle bar is of sufficient diameter to render it accurate and durable. It is made of fine steel, carefully tempered and finely finished. It makes a double-thread lock stitch, long or short, the length being regulated by thumb screw on upright portion of arm. The needle is straight self-serving. The machine is supplied with all the improvements, including tension liberator, automatic and stitch regulator. The cabinet work is a new exclusive design of the drop-head swell front pattern, with a perfect imitation of the inlaid marquetry.

It is lined with four drawers in beaded skeleton construction, finished in the popular golden quarter-inch, or figured walnut veneers. The drive wheel and main construction have ball bearings, which makes it of the lightest running machines made. Every machine is supplied with a complete set of the latest and best foot attachments, also the accessories.

M. W. & Co. Improved High Arm Sewing Machine is warranted perfect. During the time we agree to supply any defective parts free of charge, and pay cost of transportation. If it becomes necessary to replace the machine, we pay freight charges both ways.

Our Competition Sewing Machine \$8.45

Our Competition Machine shown in cut has been completed after twelve months' work on the part of our factory experts, and as the name implies, is brought out more as a matter of protection against unscrupulous competitors, than any de-

our part to handle this grade of machine; at the same time our reputation as dealers in thoroughly reliable goods warrants us in the assumption that our patrons will know we offer it for sale, it may be relied upon as being far better than any other machine offered at \$10.00 or under elsewhere. We know from experience there is demand for a sewing machine (without attachments) intended for family sewing, and as such we offer the Competition at a remarkably low price of \$8.45, with the unqualified assurance that it is equal in every respect to machines sold elsewhere at \$10.00 each. In size, style and construction it is similar to the Duplex, in fact, the general outline of the latter corresponds very closely, only the machine is not so well finished. The woodwork is the same deep-hued style and finished in oak. We warrant for five years, also ship subject to a trial of thirty days, on our other grades, and if not satisfactory may be returned at our expense both ways and we will refund money.

No. 103: Competition Sewing Machine, as described, including one foot hemmer, gauge, thumb-screw down needles, six bobbins, oil, and two screw drivers. Weight, 110 pounds. Each

This is the Head

of our High Grade Sewing Machine described on pages 32 and 33. We consider this machine superior to any high grade machine manufactured and sold at any price. Our price is \$19.85. Do not be misled by lower prices. Our price is \$5.00 lower than the price of any other firm for a machine equal to ours.

This cut represents the famous M. W. & Co. Improved High Arm Sewing Machine Head. It is a large model, symmetrically proportioned, and the mechanical construction is of the latest improved type. It is built on the eccentric system (no cog wheels) and is not only easy running, but is one of the most durable machines made. It is double-jointed, highly polished, richly ornamented with colored flower designs and gold tracings. The face of fly-wheel, brake button, stitch regulating index, automatic spooler, tension disc, needle plate, slides, also the under works, are nickel plated and polished, which gives it a thoroughly finished appearance throughout. Every bearing is made of fine steel, case hardened, accurately fitted and adjustable. It is supplied with all modern practical improvements, including ball bearing drive wheel, tension or work liberator, double positive feed, self-threading shuttle, improved attachment holder, a perfectly adjusted take-up, especially adapted for silk thread, and a complete set of the finest steel foot attachments.

A \$5.00 Buggy Proposition

1000 Buggies Built to Order with the Monogram of Purchaser Pencil on the Seat Risers

Vehicle Factory at Chicago Heights, Ill. Owned and operated by Montgomery Ward & Co., Chicago.

We want to build 1000 Special buggies at our Chicago Heights factory during the dull winter months. We own and operate a modern, well equipped vehicle factory at Chicago Heights. This factory builds our celebrated Thornward and Peerless grade vehicles, and is crowded to its utmost capacity during the spring and summer months. The winter months, however, are very quiet, and to offset this unavoidable slowness we propose to build 1000, special, made to your order, buggies during the winter and ship them later in the year.

Each buggy will be built under the personal supervision of our manager, Will Smith, for the past three years manager of our Kalamazoo factory, and for many years prior to that, general superintendent of one of the largest vehicle factories at Cincinnati, Ohio.

Our main object in making this offer is to provide a market for our factory, and we intend to build the finest buggies ever turned out of a vehicle factory, and our prices will not be far from the actual cost of production.

It is better to sell goods near cost than to let the factory remain idle.

Our proposition is this: \$5.00 with the order and the balance of \$34.50 one week before the payment is made. These buggies will be ready to ship April 1st, April 15th, May 1st, May 15th, June 1st, June 15th, and in your order state very clearly how you want your buggy made, and when you want it shipped.

This is our Dollar Shirt

We wish to accent the word *our* because there is considerable meaning behind it. Every shirt firm in the country has a dollar shirt, but their shirt is not the same as ours. We sell the "other fellow's" dollar shirt for about 60c. Compare our dollar shirt with any you have ever seen. Note the weight and fineness of the fabric, the well made button holes, the fine pearl buttons, and when we say that our shirt is double stitched throughout, you will appreciate the meaning of the word "our." We claim without reserve that our dollar shirt is superior to any shirt offered anywhere at that price.

Time Honored Methods

Not with us. We have but little re-
spect for old methods just because
they are old. Our idea is to change
with the times—to meet new condi-
tions—to keep up with the spirit of
the times—to get ahead if possible.
New goods—wide-awake buyers—
improved systems—"go-ahead"
methods—everything the best that
money and brains can produce. We
keep our entire organization in ac-
tion to give you the best possible ser-
vice—the biggest returns for your
dollar. If a tonic is necessary we take
it—anything to better our service.
That our efforts are appreciated is
evidenced by our record for 1901
by far the largest business in our
history. Stick to us and you will win.
